Agent network management

The foundation of digital financial services

The Opportunity

Efficient agent networks are essential for any successful DFS deployment. They:

- Provide cash in and cash-out, product sales, and customer service
- ✤ Are the public face of the service provider
- Require careful recruitment, training, and monitoring
- Are complex, multi-outlet, and often remote
- Require support in terms of liquidity and risk or fraud management

We offer

- MSC conducted quantitative and qualitative surveys of over 32,000 agents in 11 countries
- We provided deep, actionable insights for providers, donor agencies, and regulators
- ★ We identified key issues and opportunities

Implementation MSC has worked with over 50 different DFS providers on:

of agent networks

- ★ Agent network economics, strategy, and structures
- igstarrow Systems for agent identification, training, and monitoring
- ✤ Agent liquidity management
- Marketing and communications for and with agents
- Risk and fraud management for agents
- Training programs for agents
